

Programme Delivery as a Service

Helping you migrate workloads, applications and data
to the Cloud

Improve your Cloud Programme Delivery Capability

NWT Programme Delivery as a service (PDaaS) provides high-calibre expertise, equipping your organisation with mission-critical assets, sought after skills and enhanced programme delivery capability

Flexible on-demand highly experienced resource

Cloud technology business models surpass traditional IT business models by enabling more agile and flexible operations, allowing IT solutions to meet the demands of the business. By scaling efficiently and providing resources based on real-time application demands, Cloud is driving the transformation of IT from cost centre to strategic business enabler.

With the speed provided by the Cloud, and by working with Cloud hyperscalers and other service providers, enterprises can shift their focus away from 'keeping the lights on' operations within IT. Instead IT teams' attention can be focused on how systems can adapt to what the business and its customers need next.

But even though Covid-19 has created an unprecedented wake-up call, many efforts to embrace Cloud have slowed or stalled. For a variety of reasons including technology, security, complexity, data sovereignty, human psychology or simply because the organisation has lost sight of where their Cloud journey was headed, many workloads remain in on-premise data centres.

NWT recognises that as companies embrace Cloud, they often don't have the skills, knowledge and experience in terms of available resources to meet this challenge. NWT provides PDaaS to meet this requirement.

NWT PDaaS provides high-calibre expertise, equipping your organisation with mission-critical assets, sought after skills, enhanced operational capability and innovative approaches.

NWT can provide highly competent senior Programme Delivery Consultants, trained to the latest industry standards, for Cloud services. Capable of working across a range of delivery platforms including Amazon Web Services, Google Cloud and Microsoft Azure, our consultants have an in-depth understanding of Agile and Lean practices, Open Source technology, software development, system engineering, scripting languages and multiple Cloud provider environments.

Cloud Programme Delivery can be broken into multiple roles, typically including migrating on-premise systems, applications and databases to public Cloud platforms. Our consultants have experience in the delivery of complex programmes of work delivered by multiple teams and will help your organisation to deploy Cloud services and further your Cloud understanding.

Follow industry best practice, our Consultants will ensure solutions are robustly designed and executed to reliably deliver the capability that your organisation needs. They can draw on the wider experience and resources of our strategic Cloud alliance partners, sharing knowledge and thought leadership on Cloud strategy, the end-to-end customer experience and the innovative thinking that is required to deliver today's digital imperatives.

What you can expect from NWT

Expect a senior Programme Delivery Consultant with considerable experience in:

- Designing, building, migrating and managing both workloads and applications in the Cloud (across many different platforms)
- Analysing and assessing the current environment
- Creating a Cloud strategy based on the business and technical needs of the business
- Using Cloud hypervisor products and services including Discovery and Migration Tools, Roadmaps and feature sets
- Cloud migration methodology
- Envisioning the ideal solution including appropriate scoping
- Building a roadmap to success that considers both technical and non-technical characteristics of your business landscape
- Commercial management including effective budget management across an organisation, programme or product view within the constraints of the project
- Building successful teams and helping them to maintain a focus on delivery
- Solving issues and unblocking issues between teams or departments at the highest level
- Cloud security
- Maintaining ongoing support to ensure continued productivity post-migration

Our Way of Working

We know that it is a daunting task to devise and implement the complex transformation projects which are necessary in making the change to digital. NWT is happy to share our experience to support you in both designing and delivering successful projects and programmes. We pride ourselves in the intelligent application of appropriate methodologies to enable defined project outcomes which will deliver the changes required by your organisation.

Using our nimble and iterative four-stage process our consultants will help you to deliver key projects on time and within budget. They can introduce and embed project management practices within your organisation to bring improvements in delivery support, governance and ultimately more consistent success of your projects.

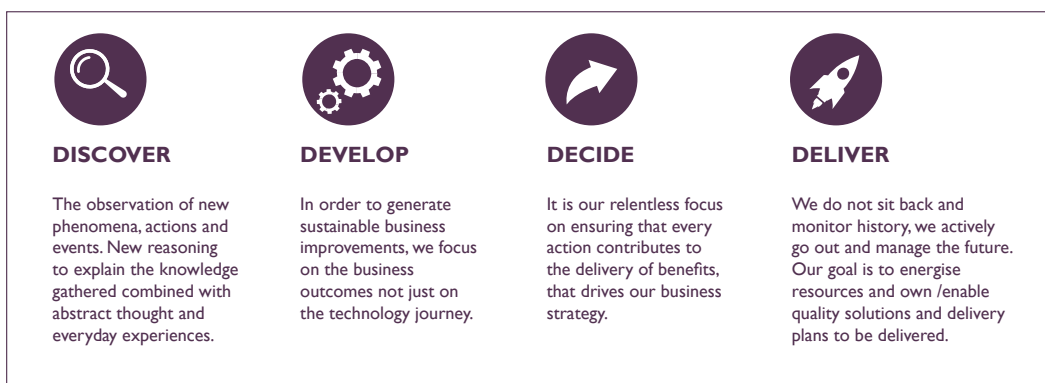

Our core values are simplifying the complex, sharing knowledge and expertise and an unwavering commitment to doing what is right. These values help us remain focused on working as a team to serve our clients and deliver beyond their expectations.

We recognise our clients need both long-term, project-based, multi-person engagements and short-term, short-notice, single person engagements, which is why NWT adopts a flexible engagement approach which can deliver either.

Whatever your Cloud requirements, NWT can provide the PDaaS you need to modernise and / or migrate with speed and confidence. Our dedicated Programme Delivery Consultants will work in partnership with your internal project team and stakeholders sharing their experience in architecting and migrating workloads to the public Cloud.

To meet our strategic Cloud Consultants and discuss your requirements in more detail, please contact info@newworldtech.io indicating your area of interest and a member of our team will contact you to discuss how we can help you.
